

You are organizing a professional multi-conference called World Congress CS-IT Conferences in year 2016. The followings are the information about these multi-conferences.

**December 5<sup>th</sup>, 2015:** Submission of draft papers (2000-5000 words), extended abstracts (600-2000 words) and abstracts for inter-disciplinary communication (300-600 words).

**January 26<sup>th</sup>, 2016:** Notifications of acceptance.

**February 26<sup>th</sup>, 2016:** Submission of camera-ready or final versions of the accepted papers

**July 7<sup>th</sup>, 2016:** Conference Starts

**July 10<sup>th</sup>, 2016:** Conference Ends

The conference **location** is in Hilton Hotel, Orlando, FL, USA

You will create a conference web site front pages. Here are some of the information to be included at the first stage development.

There are menu items on top of all pages which allow user to navigate to desired page.

Some attendees are paper presenters. Before the conference starts, there are call-for-paper announcements on your web site. People can submit papers for possible presentation on these conferences.

The registration fee is based on the status of the attendee. If the attendee is a student then the registration fee is lot lower than the regular registration. If a person or group of authors who have two or more papers to present on a particular conference, then the second paper will receive 50% discount of registration fee. For example, if regular registration fee is \$600, then the second paper requires only \$300 for the registration.

### Requirement for the step1 of this project

- (1) Use HTML 5 and CSS to develop your web site
- (2) For general user web page interface, there is a navigation menu on top of your pages  
The navigation menu includes the following

#### **Home**

- When clicked will go back to the home page which contains announcement of this conference

#### **Keynote Speakers**

- When clicked will direct the page to another page with five keynote speakers. Find five famous people in IT and CS area and their biography and make up a title for their speeches

#### **General Information** (it shall have a submenu of the following)

- About the conference    The history of the conference, goal, etc...
- Conference Fee (student and non-student have different rate)
- Hotel Information        location of the hotel encourage attendee to reserve hotel room as soon as possible. Mention that conference only block certain number of rooms until May 20<sup>th</sup> 2016 for a discount rate, etc..

#### **Call for paper**

- This page contains announcement of the conference event

- Choose at least five areas in IT and CS, for example: Computer Security, Artificial Intelligent, Software Engineering, Parallel Processing, Clouding Computing, Sematic web, Simulation and Modeling, Computer Visualization, Human Computer Interface, etc..

#### ✚ **Important Dates**

- Use the information given on first page of this handout

#### ✚ **Major Areas**

- List the research areas of your conferences and their possible topics
- For example, if one of your area is Parallel Processing, the sub-areas or topics may be
  - Parallel algorithms
  - GPU computation
  - Scientific Parallel Systems
  - Etc
- Search the internet and find different sub-areas of the areas you chose.

#### ✚ **Paper Submission**

- (Don't have to implement at this stage. Just say "Under construction when user click on this item)

#### ✚ **Reviewer Login**

- (Don't have to implement at this stage. Just say "Under construction when user click on this item)

#### ✚ **Online Registration**

- Ask user to enter personal information and affiliation information such as first and last name, title, company or organization, address, phone number, email address, if user is an author of a presenter, a student, or a regular attendee

#### ✚ **Conference Program**

- Make up conference program detail schedule

#### ✚ **Guidelines**

- Guidelines to authors how to prepare his/her papers

#### ✚ **Comments and feedback**

- Ask user to leave some comment and his/her contact information

(3) Your web site shall contain some images. When an image was hovered, it will enlarge this image a little bit and go back to normal size when mouse exit this image. You may create a folder to contain all images or use hyperlink to link images from other web sites from internet

(4) Must use HTML web form and web form components such as text box, radio button, submit buttons etc.

### Submission

- ✚ Name your home page index.html
- ✚ Use relative path hyperlink to navigate to other page on your web site, don't use absolute address such as c:\documents\... to navigate to other pages
- ✚ Create a folder call it *yourname-proj-1-1* and put all your web pages and sub folders, if any, into this folder. *Yourname* is your firstname-lastname
- ✚ Zip this folder and submit it to Canvas.

### Due date

9/23/2015 before midnight
